

Konstantinos Mourelas

Technical Artist · Game Developer

Patras, Greece • mourelask@gmail.com • mourelask.github.io

Technical artist and gameplay programmer with over a decade shipping games, AR/VR and real-time graphics. I specialize in rendering pipelines, shaders, VFX and lighting — and I'm equally at home building gameplay systems, tools and UI. I like owning the visual side of a project end-to-end and bridging the gap between art and engineering.

PROFESSIONAL EXPERIENCE

Terahard

Technical Artist & Programmer

2024 – Present

Owning the visual pipeline across two upcoming titles while contributing to core architecture, gameplay and UI.

Dunebound Tactics

- Built and own the graphics pipeline — custom shaders, VFX, lighting and post-processing
- Contributed gameplay systems and UI features

RuneSmith

- Established the project's core architecture — character controllers, interaction systems and UI
- Led visual development, including shaders and a custom outline-renderer feature

eNVy softworks

Patras, Greece

Technical Art Director

2018 – 2024

Co-owner (30%) of the award-winning studio, leading both art and technical direction across a wide range of projects. Highlights from those years:

- Over 50 projects for 30+ clients in interactive media on mobile, desktop and web — mainly augmented and virtual reality
- 20 exhibitions and conventions
- 8 competitions and countless workshops, game jams and prototypes
- Two games featured at the Gamescom Indie Arena Booth
- A game shipped live on Steam

Basements 'n' Basilisks

- Gameplay programming lead
- UI design and implementation
- 3D and technical art lead

Dimday Red

- Technical art and optimization lead
- UI programming

Respace Twin

- Led development of the Unity mobile app
- Custom partitioning system streaming BIM data from the cloud at runtime

Ariel AI

- Led a Unity mobile app showcasing ArielAI machine-learning models on humanoid rigs in real time, in AR and networked scenarios

Realiscape

Patras, Greece

Lead Unity Developer

2016 – 2018

- Led design and development, from the ground up, of a VR Cave firearms simulation
- In charge of product design and visualization
- Introduced and led the team's asset creation through photogrammetry

HYPERCO

Ioannina, Greece

Lead VR Developer

2013 – 2015

- Developed stereoscopic 3D applications (visual tour and educational mini-games) for the Perama Cave media center
- Post-production of 3D models created by laser-scanning parts of Perama Cave
- Produced a stereoscopic 3D short documentary, directed and rendered inside Unity

TigerX

Cornwall, UK

Senior 3D Visualization Artist

2012 – 2013

- Photorealistic visualization for architectural visualization and advertising
- Workflow improvements via custom 3ds Max tools (MAXScript)

Freelance

Patras, Greece

3D Generalist

2010 – 2016

- Architectural visualization
- Product design

EDUCATION

Electrical and Computer Engineering

University of Patras , Greece

2003

- Master Thesis: Unbiased 3D Rendering for Photorealism

ADDITIONAL INFO

- **Software:** Unity, 3ds Max, Blender, Substance Designer, Substance Painter, Photoshop
- **Technical:** Shader creation, GPU pipeline setup, graphics optimization, workflow tool design, software architecture, gameplay programming, full asset pipeline (modeling, baking, texturing, in-engine setup & optimization)
- **Programming:** C#, C, GLSL, HLSL
- **Languages:** English (fluent), Greek (fluent)
- **Interests:** Building & modding custom 3D printers (Voron), engine programming, mentoring artists and devs, and sci-fi/fantasy novels
